POWERING OPPORTUNITY

At GreyStone, we take an active role in driving economic development across our region. By partnering with local governments, economic development agencies, real estate professionals and site selection consultants, we help attract new businesses and support the expansion of existing ones.

When large businesses connect to our lines, the benefits extend to all our members. Increased power sales create economies of scale that help maintain competitive rates, while new property tax revenue strengthens local communities. These developments also generate quality jobs, support infrastructure investments that enhance power reliability and improve efficiency at generating plants, reducing overall operational costs.

Over the past year, our team has been focused on several exciting opportunities to serve large commercial and industrial customers. GreyStone Power is proud to support the continued growth of Turano Georgia Bread, located in Villa Rica. The company is investing \$100 million to expand its facility by 150,000 square feet, adding new baking and freezing capacity to meet increasing demand. This major project will create 100 new jobs in the community and is expected to double Turano's electric use, reflecting the strength of their operations and the reliability of GreyStone's energy service. Turano's expansion underscores both their long-term commitment to west Georgia and the region's position as a hub for food manufacturing and distribution.

GreyStone remains a key force in west Georgia's economic growth. Through strategic partnerships and support for large-scale business investment, we are helping ensure a stronger, more prosperous future for the communities we serve.

Get ready for fast.

GreyStone Connect is the area's first true fiber.

With speeds up to 2GB, you'll get video chats that don't freeze, movies without lag, and gaming as fast as everyone else.

Check your availability at
GreyStoneConnect.com.

YOU'RE GONNA LIKE FAST

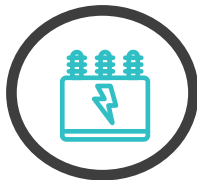

The Steps to Restoring Power

When a major outage occurs, our crews restore service to the greatest number of people in the shortest time possible – until everyone has power.

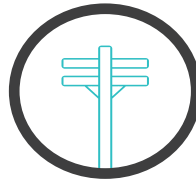

1. High-Voltage Transmission Lines

These lines carry large amounts of electricity. They rarely fail but must be repaired first.

2. Distribution Substations

Crews inspect substations, which can serve hundreds or thousands of people.

3. Main Distribution Lines

Main lines serve essential facilities like hospitals and larger communities.

4. Individual Homes and Businesses

After main line repairs are complete, we repair lines that serve individual homes and businesses.

GreyStone Power offers outage text alerts to keep you updated. Members are automatically enrolled, so no action is needed to participate. If you opted out of outage texting but would like to re-enroll, text ENROLL to 81492.

Message and data rates may apply. For members who wish to opt out of our texting service, text STOP to 81492 to opt out.
