## GREYSTONE MARKETPLACE

GreyStone is committed to helping you save energy *and* save money. Come check out the GreyStone Power Marketplace, your go-to spot for energy-efficient products. The Marketplace features many products such as smart thermostats, smart bulbs, EV chargers and so much more. You'll also find FAQs, compatibility guides and blogs about how to research items that will work best for your home.

Get rewarded for shopping through the Marketplace. GreyStone offers special discounts and instant rebates when you buy direct. Also, depending on the time of year, GreyStone runs sales for products in the store, so be on the lookout for those.

During the winter, it's likely that your biggest energy expenses are heating your home and water heating. The cost of heating and cooling often makes up more than 50% of your home's energy costs, so that is a good area to focus on when trying to reduce your total monthly electricity cost.

Bundle up for February! As part of our winter sale, we will be running a discount on the Honeywell Home Thermostat. Be sure to check it out if you're in the market for a new, smart thermostat.

Keeping your heating and cooling system running efficiently, through regular maintenance, and reducing your water consumption can help with winter energy expenses. The Marketplace features a variety of water-saving products to help you save hot water and energy without sacrificing performance.

Another fantastic feature of the Marketplace is the option to have products shipped directly to your home. Plus, GreyStone offers a hassle-free return process if you're not completely satisfied (certain exclusions apply). Visit [greystonepowermarketplace.com](http://greystonepowermarketplace.com) for more details.
