ENERGY *Savings*

SAVING ENERGY AND SAVING MONEY? HEATING AND COOLING ARE USUALLY THE CULPRITS FOR ENERGY EXPENSES IN YOUR HOME, SO GREYSTONE RECOMMENDS SETTING YOUR THERMOSTAT ON 68 DEGREES DURING THE WINTER. MAKE SURE TO CHECK OUT THE GREYSTONE MARKETPLACE FOR HELPFUL RESOURCES AND AVAILABLE REBATES. VISIT GREYSTONEPOWERMARKETPLACE.COM FOR MORE DETAILS.

GENERATOR SAFETY

ELECTRIC GENERATORS ARE VALUABLE TOOLS DURING THE RARE POWER OUTAGE. INTERESTED IN A HOME STANDBY GENERATOR? VISIT GREYSTONEPOWER.COM/GENERATORS. TO LEARN MORE ABOUT HOW TO SAFELY USE YOUR GENERATOR, VISIT GREYSTONEPOWER.COM/SAFETY.

YEAR IN REVIEW

As we look back on another year, GreyStone Power has achieved many notable accomplishments, including the first GreyStone Connect fiber internet customer, capital credits returns, successful vegetation clearing and more.

GreyStone returned another \$12 million in capital credits to members and former members in October. As a not-for-profit electric cooperative, we strive to keep costs affordable and return funds to our members whenever possible.

Along with returning capital credits, GreyStone's rates are lower compared to other electric utilities. For those using 1,500 kilowatt-hours a month during the winter of 2024, GreyStone's rates were 20% cheaper than Georgia Power's. And compared to the rest of Georgia's 41 electric co-ops, GreyStone Power rates were 15% lower than the EMC average.

GreyStone's operations and engineering division continues to work and plan to make sure you have power whenever you need it. A team of employees from various departments looked at ways to improve reliability, while crews cut vegetation from more than 500 miles of line.

2024 was a milestone year for GreyStone Connect, with the first customer being connected in February. So far, over 650 miles of fiber have been built and more than 1,400 members have been connected. This far surpassed the 2024 goals of 500 miles and 800 activations. Phase 2 of the project has been a huge step forward in providing reliable, high-quality internet to our unserved and underserved members.

The year 2024 was a memorable one, and GreyStone will continue to work hard to make life better.

Dear Member,

We know you have far better things to think about than your power.

That's why we're always working hard to keep the reliable power flowing.

Reliably yours,

GREYSTONE
POWER CORPORATION
Making Life Better

RATED **99.98%** RELIABLE

GreyStone is focused on making life better for the next generation. While attending career fairs all over the service area, the GreyStone team's community involvement helps to expose young adults to careers in the energy industry.
