YEAR IN REVIEW

As we look back on the year, GreyStone Power celebrates several major milestones, such as surpassing 3,100 GreyStone Connect customers, returning capital credits, completing extensive vegetation management and more.

GreyStone returned \$10 million in capital credits to members and former members in October.

As a not-for-profit electric cooperative, we remain committed to keeping costs affordable and returning funds to our members whenever possible.

In addition to benefiting from capital credits, GreyStone members also experienced lower electric rates compared to other utilities across the state. For members using 1,500 kilowatt-hours a month during the winter of 2025, our rates were 24% lower than the local investor-owned utility's rates. Compared with Georgia's 41 electric cooperatives, GreyStone's rates were 13% below the EMC average.

Our operations and engineering teams work year-round to ensure you have power when you need it. This year, an internal cross-departmental team explored new ways to strengthen system reliability, while crews cleared vegetation along more than 775 miles of line.

GreyStone Connect also saw tremendous growth in 2025. More than 1,160 miles of fiber have been built and over 3,100 members are now connected, exceeding our goals of 900 miles and 3,000 activations. Phase 3 of the project marks a major step forward in delivering fast, dependable internet to unserved and underserved members. Learn more at greystoneconnect.com and stay tuned to our social media pages for an announcement on Phase 4!

2025 was a remarkable year, and GreyStone remains dedicated to making life better for the communities we serve.

**YES, YOU OWN
A POWER CO-OP.**

**NO, YOU DON'T HAVE
TO CLIMB ANY HIGH,
SCARY POLES.**

You probably didn't wake up this morning thinking, look at me, owner in an amazing power co-op. Congratulations! Now for the obvious next question. What's a co-op again? As a co-op, GreyStone Power is owned by our members. We're here to deliver reliable power, for as low a cost as possible. Being a co-op means we can focus on what a power company should focus on: reliable power. You'll see us out in the community, proudly making things better every day. So say hi! And enjoy owning your very own power company.

*Get the benefits of a co-op, without
having to scale anything at all!*

**There's power
in your co-op.**
