ECONOMIC DEVELOPMENT

GREYSTONE'S COMMERCIAL MARKETING AND ENGINEERING TEAMS TOURED THE REFITTED ZOETIS FACILITY, A \$600 MILLION INVESTMENT. THIS DOUGLASVILLE SITE WILL EVENTUALLY SUPPORT 137 EMPLOYEES, ADVANCING INNOVATIVE PHARMACEUTICAL TECHNOLOGY FOR ANIMALS.

ENERGY-SAVING TIPS

Summer is almost here, and GreyStone is ready to help you manage your energy use and reduce costs. Preparing your HVAC system before the arrival of extreme temperatures is the best way to ensure efficiency, reliability and continued comfort in your home. You can find a variety of rebates, energy-saving tools and helpful tips by visiting greystonepower.com/save-moneyenergy.

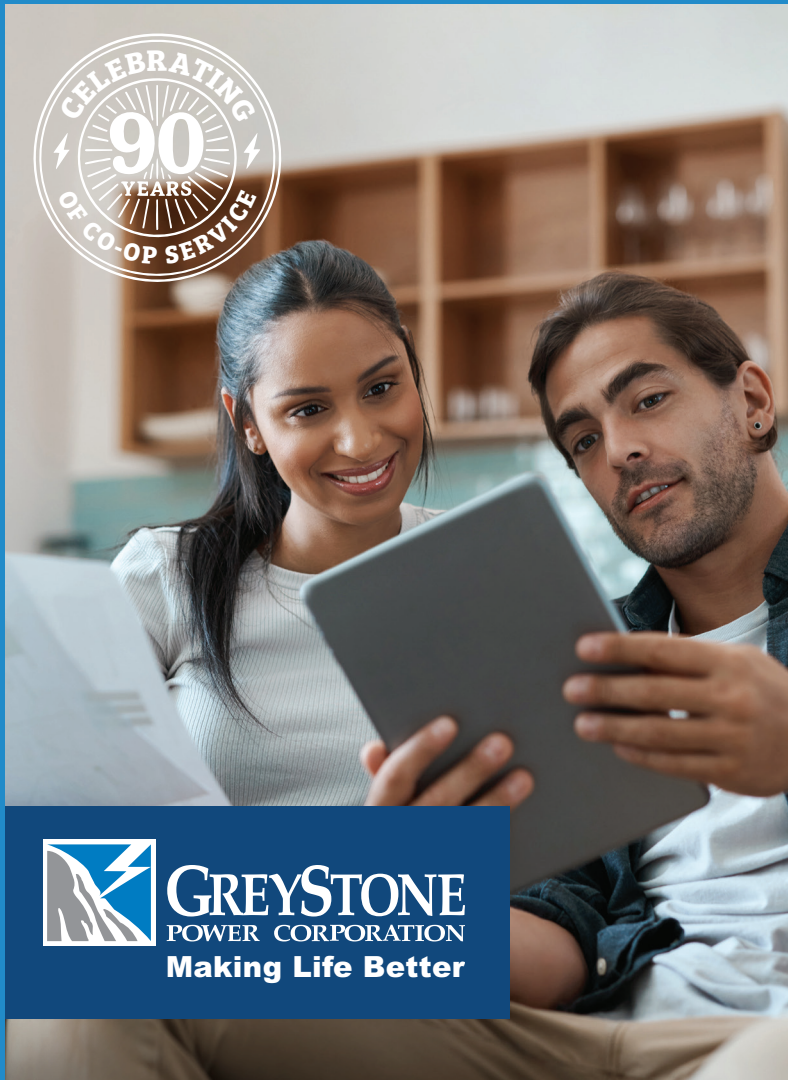

Regular HVAC maintenance is an essential step if you want to lower your total monthly electricity costs even further. A well-maintained system operates at peak performance, which reduces overall energy consumption and keeps your utility bills manageable. Issues such as dirty filters, clogged ducts and worn-out parts force your system to work much harder, which directly increases your costs. Routine professional inspections also help you avoid expensive breakdowns by identifying minor problems before they require major repairs.

Similar to a vehicle, an HVAC system will last longer and perform better with regular tuneups, helping you delay the high cost of a full replacement. Clean filters also provide the added benefit of better indoor air quality by filtering out dust, allergens and other pollutants to create a healthier environment for your family.

Since heating and cooling usually make up more than half of your total electricity bill, small changes can lead to big savings. The Department of Energy recommends setting your thermostat to 78 degrees during the summer months. You can prevent unnecessary energy waste by adjusting the temperature while you are away from home and making gradual adjustments when you return. By scheduling your professional service in the early spring and fall, you can ensure your home is fully prepared for the season ahead. GreyStone strives to help you save money through energy efficiency. That's making life better.

GREYSTONE
POWER CORPORATION
Making Life Better

WE'RE KIND TO OUR MEMBERS, AS WELL AS THEIR WALLETS.

As a not-for-profit co-op, GreyStone Power has some of the lowest energy prices in the country. Our members pay 22% less than customers of the local for-profit power company. Your affordable power is also incredibly reliable, with a reliability rating of over 99% for 2025. You'll see us out in the community, trimming trees and upgrading power lines to make sure you can count on your power when you need it.

There's power in your co-op.
