MAKE YOUR HOLIDAYS SAFE

The holidays are upon us. For many, that means more celebrations with friends and family, travel, decorations, cooking and shopping. GreyStone wants you to stay safe during the holidays, so here are a few tips to consider.

Many of us have treasured holiday mementos that we bring out of storage every year. We may also dust off specialized cooking gadgets to prepare seasonal treats. These items might be handed down and may lack modern safety features.

Take a few moments to carefully inspect all your holiday items to ensure everything is in safe, working order.

Remember, extension cords are designed for temporary use and should never be used as a permanent or long-term solution.

There are reasons why some devices have fuses, some plugs have three prongs instead of two and some have one wide prong. When those safety features get in the way of your grand holiday décor plans, you might be tempted to tamper with those features. Don't do it! If your plugs won't fit together, that means they're not designed to work together. Rather than tampering with a safety feature, always find a safe solution.

When working outside with a ladder, be mindful of the location of overhead power lines. Always carry your ladder so it is parallel to the ground. Before placing your ladder in an upright position, look around to ensure you are a safe distance from any power lines.

There is no greater gift you can give your family than a safe and happy holiday.
